

bella baby

congratulations
WE HAVE A GIFT FOR YOU

Bella Baby Photography is the exclusive newborn photographer at your hospital! One of our professional photographers will contact you after delivery to take photos of your new little one. You can also let your nurse know you are interested in photos and we will be sure to stop by. This is an exciting milestone; baby's first professional photos and we can't wait to celebrate that with you!

To prepare for your photos, we suggest you bring a favorite blanket/hat to the hospital. Clothing doesn't typically fit properly, but if you have a favorite outfit in mind, put that in your hospital bag too! Even if you don't have anything on hand, that is no problem; we use a white sheet to swaddle the baby for that classic newborn look.

Plan to spend about 15 minutes with the photographer visiting your room to complete the session. Parents are encouraged to participate in photos, but certainly never required. Within hours you will be given access to an online gallery of images that is password protected. Feel free to share this link with friends and family; they might even gift the images to you!

The hospital stay can be busy, but we promise you will never regret documenting these first moments and we are honored to be part of this memory together. We can't wait to see you soon!

*applicable on the purchase of your in-hospital gallery digital download and above packages.
